 - Our growing business needs help to stabilize it, but I truly do not even know where to begin.

WORKSHOP OVERVIEW

Overview of the Business Plan

What is a business plan and why should you have one? What is the process for creating one? Business planning is a path of discovery, starting from where you are today and building on your intentions for the future. It should be guided by sound business principles, but even more importantly, by seeking God's will and the counsel of others.

Company Culture

A company culture expresses who you are as a company and how you go about doing business. Developing and documenting such things as company history, mission, vision, and values helps to clarify, *Why does my business exist? Where do I intend for my business to go? What values guide my business both within and without?*

Market Strategy

Evaluate the economics of your entire market area to decide which customers to target. Summarize what makes you stand out in the competition and define your unique corner of the market.

Business Framework

This part of the planning includes long-term plans. For example, do you have a goal of becoming debt-free within five years? Or do you have profit margin goals you intend to maintain as your company grows? What have you established to guide future ownership of the company, such as who can potentially buy in and when and at what price?

SWOT Analysis

A SWOT analysis is a popular business tool that helps business owners and managers assess the situation their business is in. This process helps guide decisions about where to best steer the business through future planning.

Annual Plan - People

Every year a business should plan for the organization and care of its people. How solid is your employee support system? Are your people in their best places? Where does HR fit into the business plan? Planning for people is an important Biblical principle, and these plans should be organized here in your Annual Plan.

Annual Plan - Finance

A vital component of annual planning is having a good budget. Other financial aspects include profitability and asset management. It is important that the financial dimension of the business aligns with other changes or improvements in your business plan.

Annual Plan - Operations

Plan for the execution of business operations over the next year. Identify which key performance indicators (KPIs) and metrics you will use to evaluate the performance of your business operationally. Know your current operational efficiencies to know what changes and improvements are needed.

Annual Plan - Marketing

Learn how marketing fits into your business plan. An annual plan for marketing lays out how the overall market strategy will be implemented in the next year. This includes planning advertising programs, coordinating marketing budgets with the financial plan, and making sure employees know how the company is attempting to grow.

Annual Plan - Sales

Sales involves the conversion of marketing leads into sales agreements with customers. More than any other plan, sales relates to those outside the company. It is a vital part of how the business serves others and fulfills its stated mission. This requires careful planning each year.

Executive Summary

An executive summary is the distilled version of the entire business plan. Written to quickly catch the attention of those interested in the business plan, it answers key questions as fully and quickly as possible. The Executive Summary is written last, but presented first, in any business plan.

SPRING 2023 WORKSHOPS

March 28-29, 2023 Odon, IN, *Simon J. Graber Community Building*
9164 E 875 N, Odon, IN 47562

THIS WORKSHOP IS FOR YOU IF YOU FIND YOURSELF IN A PLACE LIKE THIS:

- Looking to the future, I have a will, but I'm not sure how to evaluate or handle the business in relation to my family.
 - Since I am not sure how or where to start on business succession, it is a subject I tend to shy away from and avoid.
 - I really don't have a plan and am hoping my family will make those kinds of decisions when they need to.
-

WORKSHOP OVERVIEW

Setting the Stage

Choosing a successor who will carry on your values is just one reason to transition while you are able. If you're the potential successor, explore whether you're the right person for the job and address your concerns about taking on the business.

Leadership Transition Phase

Identify a possible leadership transition team and define duties, management, and authority. Participants will learn how to set up the transition so you can mentor the new successor over time.

Understanding Goals, Objectives, Visions, and Dreams

Why were you in business? Why are you getting out? How can you use succession as an opportunity for charitable giving to kingdom-focused work? Define your visions and goals to clarify the direction and pathway of succession.

Foundational Principles for Succession

In a kingdom-focused business, scriptural principles undergird the succession process. Buy/sell agreements in family businesses often include lifestyle values that determine who is eligible to buy. Learn to openly discuss important factors, such as church practices/fellowship and family considerations, especially if there are possible conflicts.

Professional Assistance

Business successions must be done legally, not on the back of a napkin or by verbal agreement. Professionals must be consulted throughout the succession process to achieve the best conclusion for both seller and buyer.

Identifying the Successor

Learn the steps and processes in identifying a potential successor whether one child, multiple children, key employees, or an outside buyer. Explore challenging situations, such as unrealistic value expectations, difficult personalities, and distributing according to participation.

Valuation

Establishing a fair market value is very important, even when selling to family members. Learn valuation methods and define what is included in the sale. Discover the benefits of using professional, experienced help in a valuation.

Payment Terms

Payment terms are often more important than the sale price since they address the concerns of the former owner. Will you sell assets, or percentage of ownership? Will you do a one-time payment or incremental payments? What about seller salary, benefits, and healthcare? Will inventory be sold in a lump sum, or as sold?

Funding

Company profits can fund an owner-financed or a bank-financed purchase. This is a place where charitable giving can provide for the church or other kingdom-focused projects while reducing tax impact and cash needs and still be fair to other family members.

Setting It All in Motion

Learn how to make a timeline to finish the sale and set it in motion. Transition shouldn't be a big event, but rather the next step in the continuation of your life experiences. Develop a plan for how to get the process done and announce the transition to key people.

Pitfalls, Opportunities, and Possibilities (POPs)

Understand how ugly it can be if business owners don't plan for succession, how neutral it can be if they plan a little, but how good it can be if they plan properly—for themselves, their families, and for the kingdom.

Workshop Takeaway Discussion

How are *you* going to apply what you've learned in this workshop?

- I've never really liked the word "sales" and am not really sure I want myself or my business associated with the word.
 - I don't really understand what an effective sales process looks like or what makes sales different from our marketing program.
 - If it can be honorable to focus on sales, then I would like to learn more about how to do it in a way that honors the Lord and serves people.
-

WORKSHOP OVERVIEW

Sales Foundations

Selling has not always been conducted honorably, but we are called to a much higher standard. Sales can be done in a scriptural manner that is godly, that benefits the lives of others, that is personable and genuine, and that manifests patience and respect for others.

Sales Capabilities

Certain people seem to excel at Sales, while others struggle. Yet all kinds of different people have enjoyed and been successful in it. We'll look at some of the characteristics, mindsets, and skillsets needed to be successful in Sales and how they can be cultivated and improved.

Sales Preparation

Before attempting to begin the sales process for goods or services, sales people need to fully understand both the needs of the marketplace and the goals of the company. Success in Sales requires seeking to harmonize the reality of both.

Sales Process

The role of Sales varies among different sizes and types of companies. The culture of sales also varies among different industries. Yet there is a common process that can be studied and adapted for successful selling in each individual business. This includes:

1. Prospecting
2. Qualifying leads
3. Discovering needs
4. Providing solutions
5. Overcoming objections
6. Closing the sale
7. Following up

Sales Toolsets

While the basic process of sales remains the same, different companies and sales people utilize different tools to manage it. This section will look at the use of mapping, literature, CRM systems, and other tools to enhance the efficiency of the process.

Sales Management

Many times the sales teams starts with only the founder. Growing beyond one salesperson to include multiple people in sales, and even someone managing the team, represents a significant challenge. It calls for a new and different focus, as well as additional skillsets and tools.

Sales Resources

Success in sales can be enhanced by utilizing the many resources available to learn and grow. This workshop is one of those resources, and more can be learned from books, articles, online resources, and peer groups of other people with the same desire.

- Accounting feels like a necessary evil in my life and something I basically do for taxes.
 - I don't understand enough about accounting to use it to make a difference in my company.
 - Isn't accounting all about the past? I prefer to focus on what's ahead in my business.
-

WORKSHOP OVERVIEW

What is Accounting?

Accounting is based on logical and mathematical realities; it is a way to manage and measure financial information. A business owner must understand what accounting is to fully grasp its ability to be used as a tool to steward his resources wisely.

Accounting for Stewardship

A central theme of stewardship is accountability. Accounting is simply a tool for accountability in the financial realm.

Accounting for Reporting

Reports can be generated even with the most basic accounting information. Reports provide a standardized and comprehensive way of monitoring how the business is doing and where it is headed.

Accounting for Tax Purposes

While not its main purpose, accounting supports tax compliance and planning.

Group networking and collaboration

Accounting for Analysis

There are a number of ways to analyze accounting reports, which provide business owners and managers with even further insights into the company's position and performance. Well-designed accounting systems allow you to easily monitor critical items like your company's gross profit margin or your balance sheet current ratio.

Accounting for Management

A better understanding of where the company has been, and where it is today, provides a solid basis for making better decisions regarding its future.
